TO WHOM IT MAY CONCERN.

Bunge Feeds Pty Ltd is currently in possession of a Xerox 451 Document Centre which was purchased in February 1999.

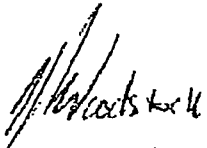

We have been very pleased with the copying efficiency and speed of the machine, its pre-collation and offset output for large numbers of multiple report copies makes for ease of collection and retrieval. The Document Centre has been excellent for our double sided price lists, we have approximately 14 different lists to be sent out to a number of different customers and using this machine it was a lot quicker and easier. We find the machine gives us a more professional look with minimum fuss. A power cut off switch for us is an excellent idea, if we forget to turn it off at night it will automatically turn off.

The added benefit of an automatic stapler mounted on the side of the machine enables reports to be stapled at the machine.

The machine has many other interface capabilities some of which aren't being utilised at the moment but it is handy knowing that its there when we are ready to utilize its full capabilities.

Touch controls take awhile to get used to but taking the time to read the operation manual does help and before long you are on your way.

Service of our "Xerox" machine is most important and servicing from "Xerox" has been very good and service calls have been responded to quickly.
